Betacus Horse Race Ranking and Training Program – User Guide

Introduction

Betacus is an application designed to help people organize horse bet selections. The program is structured like an **Abacus** which is why it is called **Betacus**. Betacus presents rankings for at least one track per day, 5 days per week (Wednesday – Sunday).

Betacus also allows users to load past race days and practice using different bet strategies.

The subscription to Betacus is \$25 per month although you can see the rankings for each race day at no cost by visiting Betacus.com. Users can also purchase tokens for day-by-day access.

Betacus Chart View

Betacus provides a Chart View of the data presented in the Metrics Table. Clicking the + or – icons allows you to filter for which metrics you prefer to view in chart format.

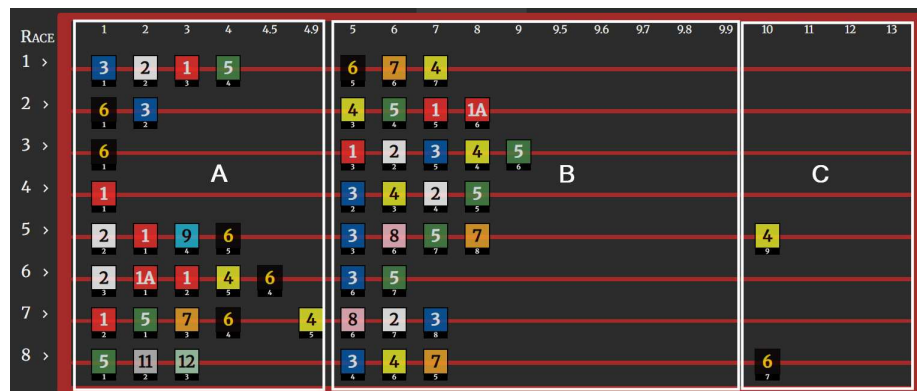

We have created models for AI analysis used to predict the ROI for specific bet types used on specific race configurations. The overlay displays an AI analysis for a particular race day and for a specific type of bet.

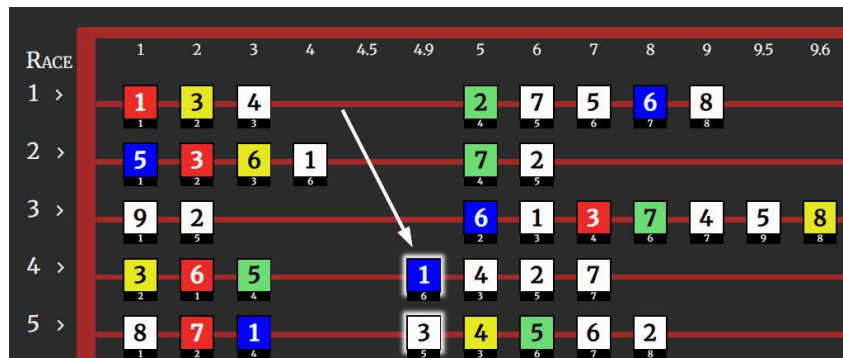

Horse numbers are presented as buttons placed into Groups A, B or C. The horses with the best chance to win have the lower Power Line (PL) odds and they are positioned from left to right.

- Group A - Most likely winners (better than 5-1 odds).
- Group B - Horses ranked between 5-1 to 10-1 PL odds.
- Group C - Horses over 10-1 odds and not expected to place in the top 3.

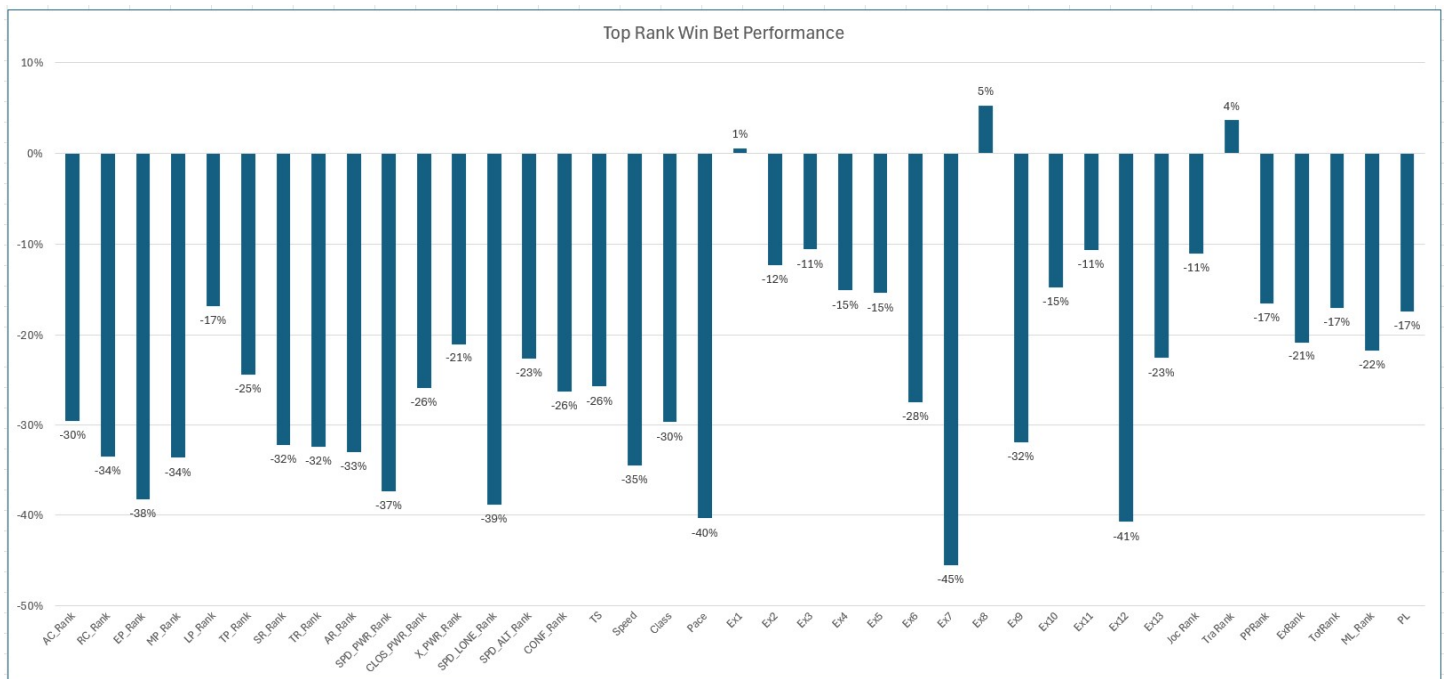

Longshot picks

Longshot picks appear in the Power Line (PL) 4.9 odds column. These selections appear with a pulsing effect animation to help them stand out.

Win Bet ROI

Betting to Win based on expert picks or data ranking systems is challenging. This chart shows the Percent ROI using the top ranks from various metrics (N = 400 races at Saratoga). Only 3 of the over 30 expert picks or ranking metrics produced a positive ROI.

Post race results, Scorecard and AI Analysis

Following each race day, we present results, a scorecard for bet performance and an AI analysis of the ROI.

Color legend: blue = 1st | red = 2nd | yellow = 3rd | green = 4th

Scorecard

Our primary bet recommendation is the exacta. Additional information on betting options are presented on Page 7. The scorecard presents different types of exacta bets and the payouts for each bet per race. The last column (column 6) presents longshot selections. A review of past data has longshot win or place results at 20%. You can pull up past race days in the Historical tab to view our running scorecard performance.

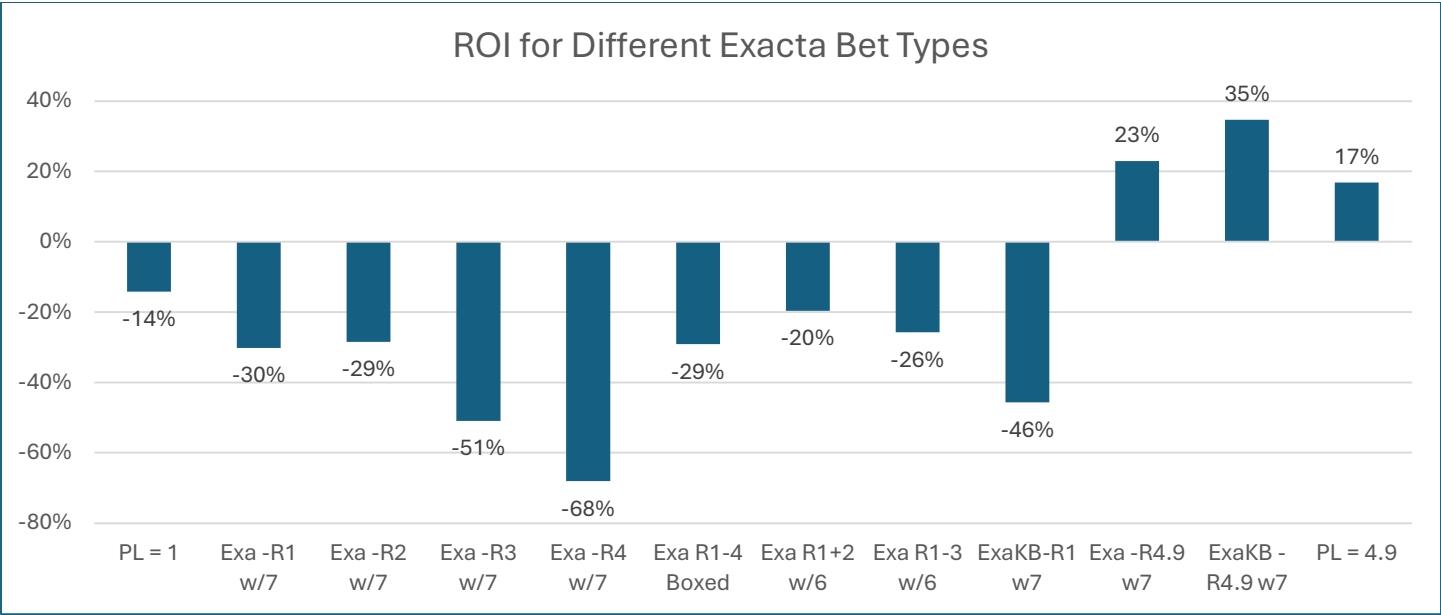

This is a legend for the different exacta type bets. The table presents the payout for each bet type.

Label	Bet	Explanation
A	4x4	Exacta box using Top 4 ranks w/ Top 4 ranks
B	12 w/1-6	Exacta using Top 2 ranks w/ Top 6 ranks
C	1-3/1-6	Exacta using Top 3 ranks w/ Top 6 ranks
D	1 x all KB	Exacta key box using top rank w/ ranks 1-7
E	LS x all KB	Exacta key box using longshot w/ ranks 1-7
F	Longshot	Longshot payout for Win, Place or Show

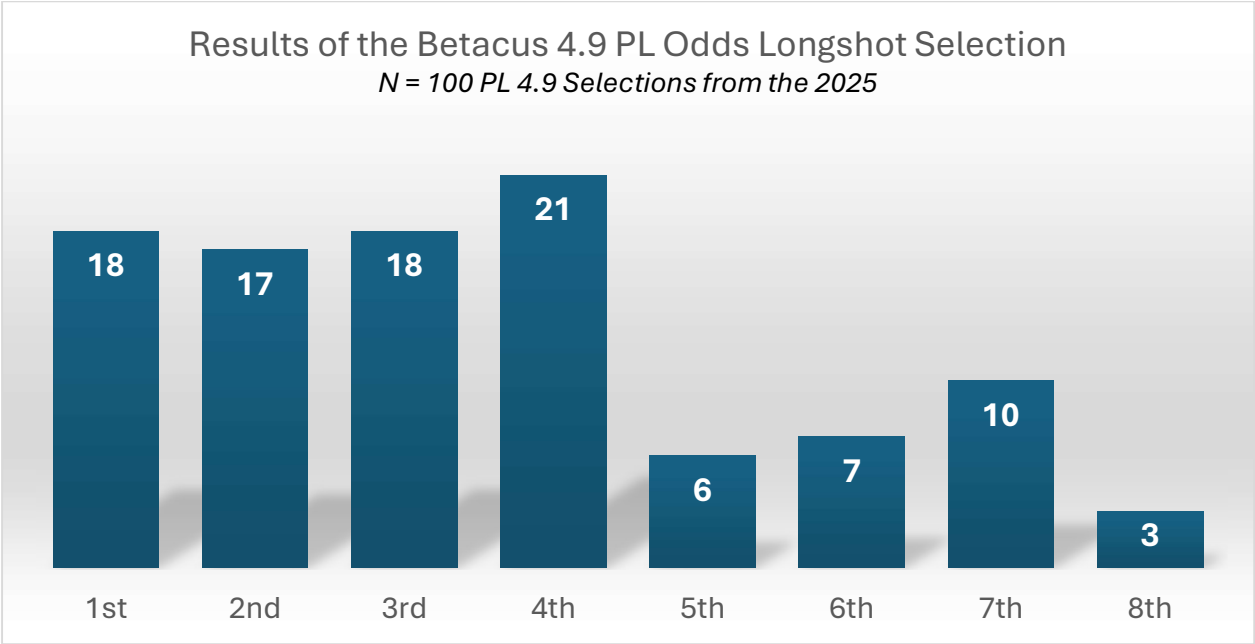

Scorecard – ROI by Bet Type

An analysis of what we call **BET CONFIGURATIONS** identify which type of exacta bet produces the best ROI. The bet configuration with the top ROI is the Exacta Key Box using the longshot selection placed in the 4.9 PL odds channel as the Key.

Power line (pl) 4.9 Odds selection Performance

The chart below presents the distribution of results for the 100 times Betacus presented a longshot selection during the 2025 Saratoga Season. We are hoping with the newly implemented AI support and continued alteration in our win pick algorithms, that we can produce a higher percent of first and second place results.

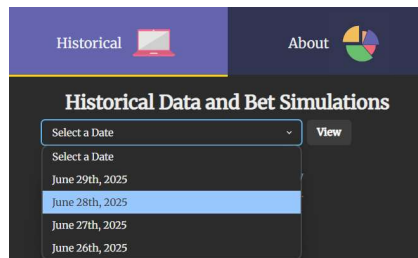

Betacus Historical – Bet Training Application

The Historical Tab in Betacus is used for practice betting. You will be able to experiment with different types of bets and see if you can come up with a positive result.

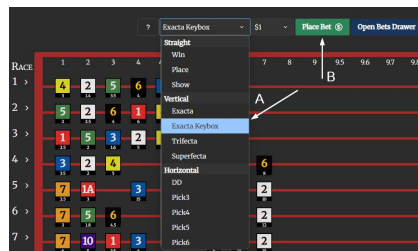

Proceed to the historical tab and select a race day from the drop down. We recommend exacta bets to start with because they have a decent ROI and the cost is lower than other popular bet types. Also, the track takes less percent of the betting pool for exactas than other bet types. To win an exacta bet, you have to pick the horse that wins and the horse that gets second. The trifecta is similar except you also have to select who gets third. The superfecta is similar but you have to pick who wins, gets second, third and fourth.

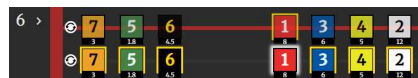

To experiment with different types of bets, start by selecting a race day.

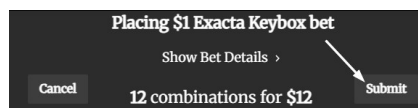

Select the type of bet you would like to make then click the green button for *Place Bet*

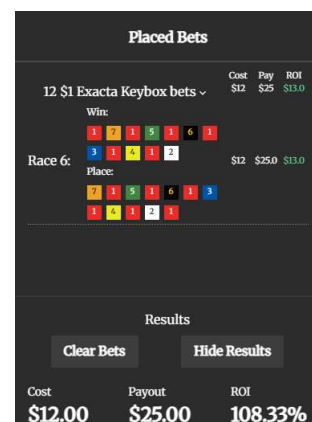

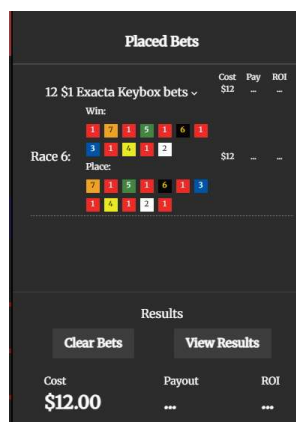

For an exacta keybox, select your Key first, then select any other horse you wish to include in the bet.

Click the Submit button on the top of the page.

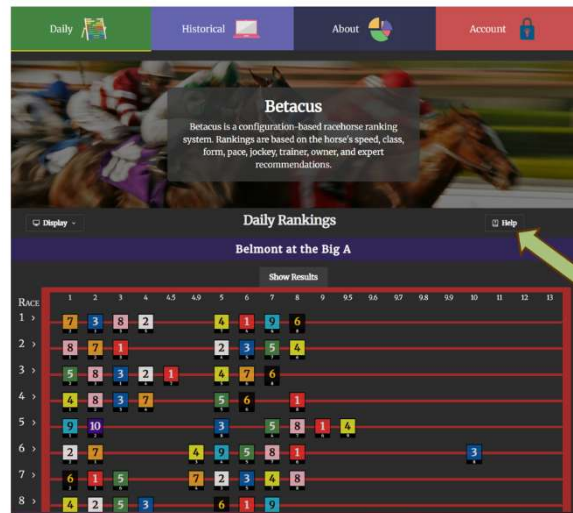

Your betting slip will open in the right margin. You can then continue to place bets or click the button for *View Results* to see how you did.

Online Tutorial

Click the “Help” button to open the online tutorial that will provide you with all the details you need to use Betacus.

Registration

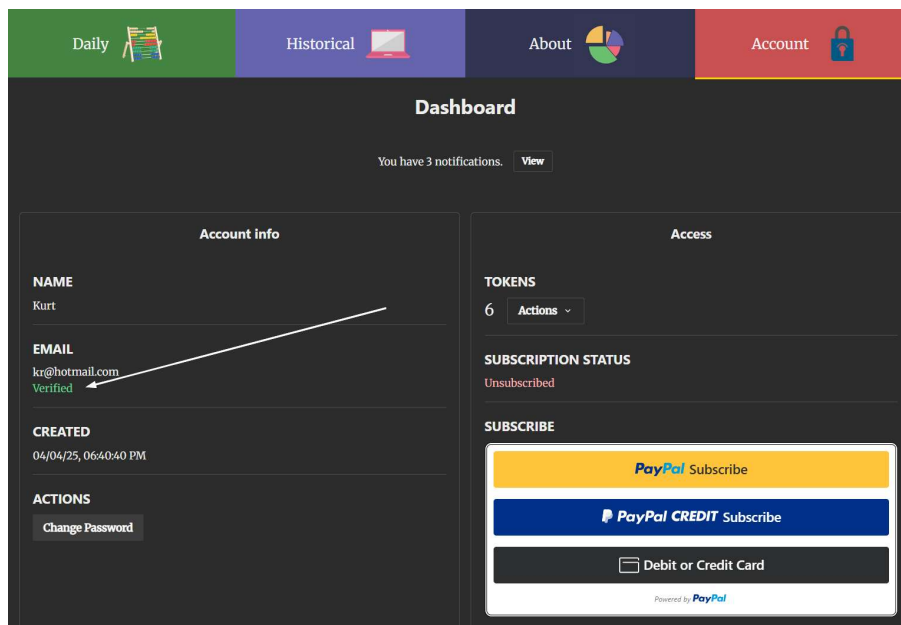

Betacus appreciates its subscribers. The support we get from subscribers will:

1. Help pay for licenses needed to present additional data.
2. Expand on our ongoing AI analysis.
3. Present more than one track per race day.

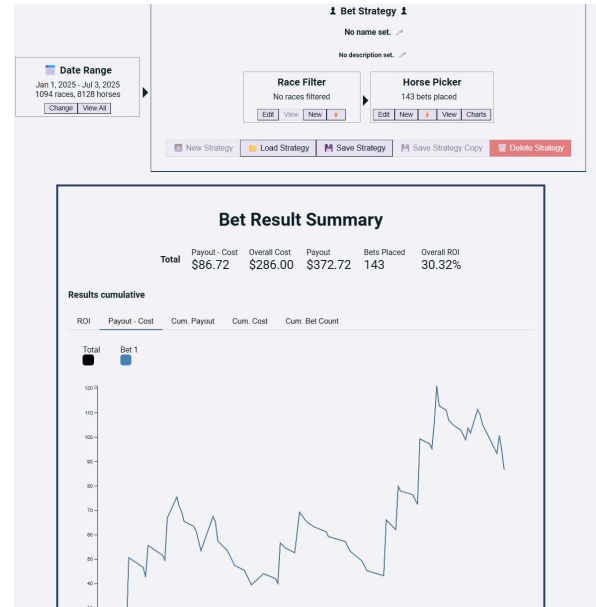

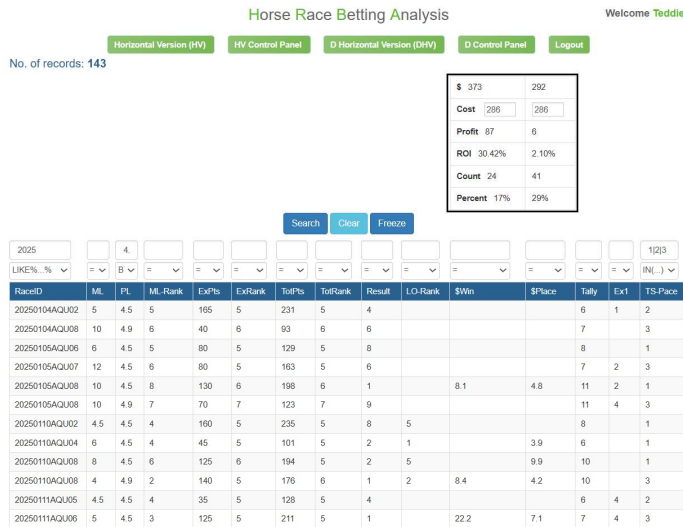

The key benefits to the Betacus subscription are:

1. Identification of horses with higher betting value (longshots)
2. View of the metrics needed to make strategic betting decisions.
3. Access to the **Bet Training Application** that allows users to practice different types of bets.

During the registration process, you will be prompted to verify your email address. Look for the email you will receive and be sure your email has been verified. You will also be asked to register as a user with PayPal and you will have the choice to pay for the monthly subscription or purchase the daily access tokens.

The Betacus ranking system has been enhanced by custom analytics systems that evaluate which metrics and combinations of metrics produce the highest ROI. We have collected data for over 39,000 races. We have also incorporated AI analysis of the collected metrics and will be using the results to enhance the ranking algorithm.

Visit the About tab on the website to view details of our analytics.

BETACUS

Betacus is an application designed to help people organize horse bet selections. The program is structured like an abacus which is why it is called Betacus. The subscription to Betacus is \$25 per month although race day tokens are available. You can see the rankings for each race day at no cost by visiting betacus.com

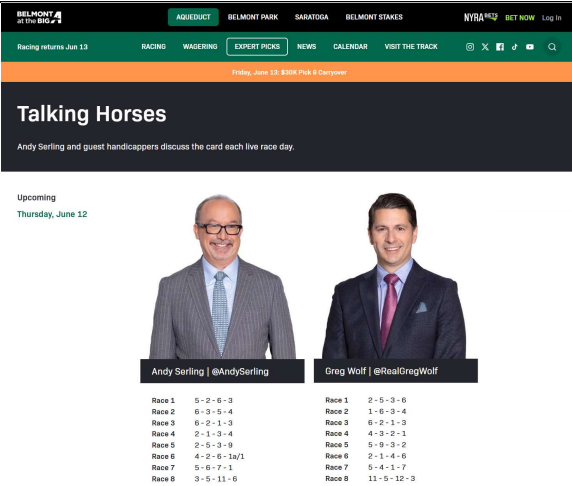

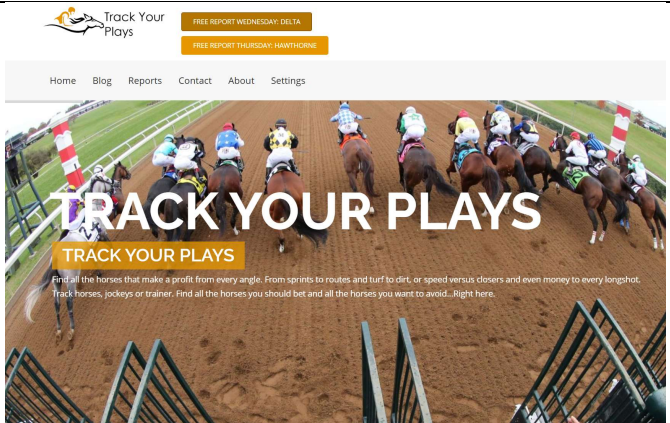

Betacus presents rankings with detailed data for at least one track per day and 5 days per week (Wednesday – Sunday).

Registered users can click the arrow under each race number to view details needed to place productive bets.

The above slides demonstrate the exceptional performance of the Betacus wagering system.

Expert Picks and Data Collection

Betacus Rankings rely on the combination of expert picks and horse, jockey and trainer performance data. We collect expert selections and performance data from multiple sources to come up with our rankings.
